

Consent Based Social Security Number Verification (CBSV)

This agreement constitutes an addendum to the Service Agreement between Employers Investigative Services (E.I.S.) and the Client.

The purpose of the CBSV is to allow the client to verify that the name and ssn does or does not match the information found in the Social Security Administrations files.

The data is matched against the SSA's Master File using SSN, Name, DOB and Sex Code. *CBSV does not verify employment eligibility nor does it interface with the Department of Homeland Security's Verification System.*

By signing this Addendum, the client acknowledges that it will provide E.I.S. with the applicant's signed release prior to submitting a verification request. Subscriber also acknowledges that they will provide E.I.S. with mandatory information such as the applicant's first and last names as well as SSN.

Client accepts full responsibility and liability and indemnifies E.I.S. for all related decisions based upon the CBSV. Client agrees to follow all state, federal and local employment laws.
